Are You a Blackberry User Looking for Real-Time Synchronization?

Do you wish your Contacts, Calendar, Email and Tasks were always synchronized between Outlook, Web Access, and your Blackberry? Now they can be, thanks to Muller Systems.

Muller Systems recently introduced their new **Blackberry Enterprise Server** which provides clients (and potential clients) who are Blackberry Users with access to their Microsoft Exchange 2007 mailbox. This means virtually all of the functions available within Microsoft Outlook are also available on your Blackberry device:

- Real time email synchronization
- Wireless Contact Synchronization
- Wireless Calendar & reminders
- Wireless Tasks

If you're looking for real-time communication between an Exchange service and Outlook Anywhere, Exchange 2007, OWA and Blackberry, Muller Systems can make it happen!

Just another example of WaudWare providing you with News You Can Use!

p.s. Here's a great tip for a small operation: Share your Outlook Calendar or Task folders with others. When updates are made from anywhere by anyone (at the office, on the road, over the web) all users instantaneously share updated information. You'll never have to worry about calling in to check on tasks or schedules again!

Software solutions from the experts in innovation ...
